

SmartZip Subscription Order Form Agreement and Details

Home rating scores & reports are now available on PropertyMinder AccelerAgent™ websites. PropertyMinder has partnered with SmartZip to allow this new reporting and scoring on thousands of Realtor websites across the county. SmartZip has created a database of over 70 million + homes where each home has been rated based on ownership or investment score. That score is what will show on agent websites, if enabled. The report adds another lead capture opportunity on our AccelerAgent™ websites by requiring the visitor to leave their information before getting the report.

With a SmartZip subscription, agents can create unlimited reports for buyers, sellers, and investors.

More information about PropertyMinder & SmartZip can be found here:
